INTERNATIONAL TRADE SERVICES

Turkey has been an important hub for trans-continental trade throughout history. With coastlines on the Black, Aegean, and Mediterranean Seas, it shares land boundaries with Armenia, Azerbaijan, Bulgaria, Georgia, Greece, Iran, Iraq, and Syria. Turkish exports are well-diversified, ranging from natural resources and low value-added products such as metals, precious stones, energy, apparel, and food stuffs, to higher value goods including vehicles and machinery. At this stage SLF Logistics will be advisor for you to find producers who produce at affordable prices.
